TECHNICAL SKILLS

- **Programming Languages** : C & C ++, Java, PHP
- **Web Development**: HTML, CSS, JS, Bootstrap, Laravel
- **Mobile App Development**: Flutter, Android Studio
- **Database Management**: SQL, MYSQL, MySQL Workbench
- **Developer Tools**: Dev C, XAMPP, Visual Studio, Eclipse, NetBeans, Microsoft SQL, RStudio

SKILLS

- Time Management
- Leadership
- Creative thinking
- Communication
- Teamwork
- Adaptable
- Self-learner-
University of Moratuwa – (CODL)

PROJECTS

- **Handicrafts Selling Web Page-Y1S2(Individual)**

Built using HTML, CSS, JavaScript, PHP, and MySQL, this website enables users to browse handicraft products, add items to their carts, and place orders. The backend manages product and order data in MySQL, with PHP handling user interactions and payment processing. An admin panel allows management of products, orders, and site updates.

- **Hospital Management System(Group)-Y1S2**

Developed using Java in NetBeans IDE, this system manages patient records, doctor schedules, and medicine stock. It allows patients to book appointments, receive reminders, and generates monthly reports with alerts for low medicine.

- **Students Record Management System(Group)-Y1S2**

Built using HTML, Bootstrap, JSON, jQuery, and XML, this system manages student records with JSON and XML handling data storage, while jQuery provides dynamic user interactions.

- **Mobile application(Group)-Y2S1**

Android app using Java, Firebase, and REST API, to provide AI-powered features with real-time data synchronization and seamless user interaction

- **Low Fidelity & High Fidelity (Group)-Y2S1**

Created low-fidelity paper prototypes to explore initial design concepts and user flows.
Developed high-fidelity interactive designs using Figma for detailed visual representation and usability testing.

- **Wanlanka – Tourist Service Application (Y2S2 Group Project)-OnGoing**

Developed a Laravel-based web application that offers comprehensive tourist packages in Sri Lanka, including vehicles, food, accommodation, and guides. The platform also provides options for external vehicle hire and accommodation booking independently from the packages, delivering flexible and user-friendly travel planning services.

- **Business Case Study and Business Model Analysis (Y2S2 Group Project)-On Going**

Conducted a detailed case study of a company, analyzing its environment and operations. Created a business model covering value proposition, customers, revenue, and strategy with key recommendations.

- **Internship Project – PetCare Application**

Developed a full-stack pet care application using Laravel for the backend and Flutter for the mobile frontend, enabling users to manage pet health, appointments, and care services seamlessly.

- **Shiproof – Warehouse Management System**

Developed a warehouse management system for Shiproof, enabling store owners to manage stock and services, and staff to handle stock receipt and dispatch. Used PHP, SQL, HTML, CSS, and JavaScript for full-stack development with a focus on user-friendly design and efficient process tracking.
